Job Title: **Civil Engineer Project Manager**

Company: Eley McPherson Engineering, P.A.
Location: Batesville, MS

Company Overview:
Eley McPherson Engineering, P.A. is a growing, multi-disciplined engineering, surveying, and materials testing firm with offices in Cleveland and Batesville, Mississippi. We serve a diverse range of clients across the county, municipal, state, federal, and private sectors, providing practical and high-quality solutions for a wide variety of infrastructure and development projects.

Our continued growth and recent expansion into Batesville reflect our commitment to serving our clients and communities throughout Mississippi while creating new opportunities for our team. We offer a collaborative work environment where employees can gain experience across a broad range of projects, develop their technical skills, and grow professionally alongside the company.

Position Overview:
We are seeking an experienced and motivated Civil Engineer Project Manager to join our Batesville team. This individual will play a key role in the planning, design, management, and delivery of civil engineering projects, working directly with clients, engineers, surveyors, technicians, contractors, and other project stakeholders.

This is an opportunity for an experienced engineer to take ownership of projects, lead design teams, develop client relationships, and contribute to the continued growth of our Batesville office.

Our projects encompass a diverse range of civil engineering work, including roadways, bridges, wastewater collection and treatment systems, water supply infrastructure, stormwater management, marine engineering and site development.

Key Responsibilities:

- Lead and manage civil engineering projects from initial planning and concept development through final design, construction, and project closeout.
- Develop and oversee engineering designs, construction plans, technical specifications, cost estimates, schedules, and other project deliverables.

- Lead and coordinate project teams consisting of professional engineers, technicians, surveyors, and CAD personnel.
- Evaluate design alternatives and provide sound, practical, and cost-effective engineering recommendations.
- Manage project scope, schedules, budgets, and resources to ensure successful project delivery.
- Coordinate with clients, contractors, regulatory agencies, surveyors, and other project stakeholders.
- Review engineering plans, specifications, calculations, and other technical documents for quality, accuracy, and compliance with applicable standards.
- Provide technical guidance and mentorship to engineers and technical staff.
- Participate in construction administration, site visits, inspections, and resolution of field and construction-related issues.
- Prepare and deliver project presentations and communicate effectively with clients and stakeholders.
- Assist with development of project proposals, scopes of work, and fee estimates.
- Build and maintain strong client relationships and identify opportunities to support the continued growth of the firm.
- Take ownership of assigned projects and ensure that commitments to clients are met with a high standard of quality and professionalism.

Qualifications:

- Bachelor's degree in Civil Engineering.
- Professional Engineer (PE) license preferred or the ability to obtain licensure within a reasonable period.
- 5+ years of progressively responsible civil engineering experience, including project management and design.
- Strong technical knowledge of civil engineering design principles, standards, and construction practices.
- Strong communication, organizational, and time management skills.
- Self-starter with the ability to work independently and manage complex projects.
- Demonstrated leadership skills, with the ability to lead design teams and collaborate with cross-functional teams.
- Strong desire to contribute to the continued growth and development of the Batesville office and the firm.

Why Join Eley McPherson Engineering?

At Eley McPherson Engineering, you will have the opportunity to take ownership of meaningful projects, work directly with clients, and make an impact on a growing engineering firm.

Our diverse project portfolio provides the opportunity to work across multiple areas of civil engineering rather than being limited to a single project type. As our Batesville office continues to grow, this position offers the opportunity to help shape the office, develop

client relationships, mentor younger engineers, and play an important role in the firm's future.

We value technical excellence, practical engineering, teamwork, professional growth, and long-term relationships with our clients and employees.

Benefits:

- Major Medical Insurance
- Life Insurance
- Short-Term Disability Insurance
- Simple IRA Retirement Plan
- Paid Vacation and Holidays
- Sick Leave
